

DATA SHEET

Business Transaction Monitor with DéjàClick

Resides inside the browser.

Utilizes TrueUser™ technology.

Generates scripts automatically.

Adapts continually to Web dynamics.

Provides end-to-end transaction perspective.

The AlertSite® Business Transaction Monitor with DéjàClick™ is the industry's first inside-the-browser Web performance monitoring platform, featuring a transaction recording-and-playback system that automatically creates monitoring scripts based on users' click streams.

While traditional performance measurement tools are passively data-center focused, DéjàClick responds seamlessly to Rich Internet Applications (RIAs). It automatically adjusts for human think time, cookie-based form filling, distinctions between first-time and repeat users, and other dynamic Web 2.0 elements.

DéjàClick, using AlertSite®'s TrueUser™ Technology, is a best-of-breed solution for recording, editing and replaying transactions in a browser. Its scripts repeatedly play back user clicks and keyboard input, systematically monitoring Web sites from multiple locations around the world.

DATA SHEET

Business Transaction Monitor with DéjàClick

AlertSite®'s Business Transaction Monitor with DéjàClick offers the industry's first inside-the-browser monitoring technology.

DéjàClick Special Features

- *Adaptive Playback.*
DéjàClick automatically adjusts for cookies, caching, certificates, JavaScript, delayed user responses and other dynamic features of RIAs.
- *End-user Computing (EUC).*
Scripts are created automatically as a byproduct of mouse clicks and Web site browsing.
- *Global Monitoring.*
Monitoring scripts continuously and automatically monitor performance from multiple locations around the world.
- *End-to-End Transaction Perspective.*
End-to-end Web-based and server-based metrics are incorporated into a single AlertSite® management console.

Benefits of DéjàClick Technology

- User activity is recorded and played back automatically, allowing quick detection and resolution of problems.
- No need for hand coding or maintenance; scripts are generated automatically.
- Script property editing is easy, intuitive and flexible.
- Toolbar provides easy access to detailed reports, graphs and alerts.
- Simplified page and event keyword validation.
- DéjàClick is seamlessly integrated into AlertSite®'s suite of Web-based monitoring tools.

Special Feature: DéjàCapture

DéjàCapture is a special DéjàClick feature that provides a complete snapshot of your Web site when an error or alert occurs, and allows you to drill down within the data to identify root causes.

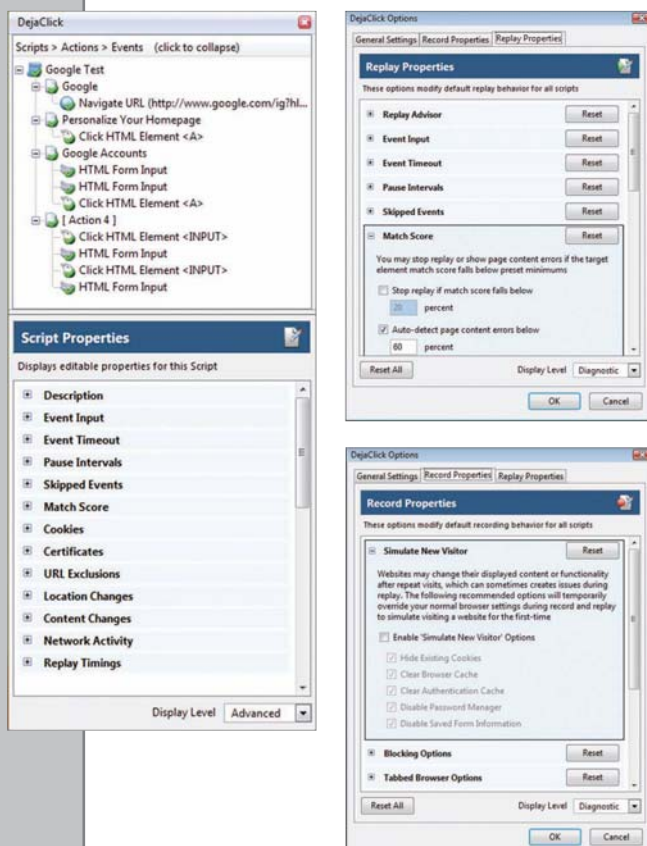

In a single JPEG file, DéjàCapture displays

- The screen image
- Header information
- Screen Capture

DéjàNotes – Annotating DéjàClick

A highly flexible tool, DéjàNotes allows you to overlay messages onto DéjàClick scripts. The notes appear onscreen for other DéjàClick users to see when they replay scripts. DéjàNotes can be as elaborate or as simple as necessary. They may contain short comments or reminders, or detailed instructions, hyperlinks and videos.

You choose the size, shape, color and placement of notes onscreen, as well when they appear in a given script, and for how long. In addition, you determine whether script playback pauses, stops or continues when notes appear. Notes are also easy to modify.

Left: The DéjàClick sidebar details script events and allows editing of properties for each.

Right: The DéjàClick Options Configurator provides users with numerous record and playback options.

Web Applications that Benefit from DéjàClick

DéjàClick can be of critical value to:

- Travel and hospitality search and reservation engines.
- Maps and directions tools.
- Equipment configurators.
- Product finders/search.
- Any Web-dependent industry, including: computers, financial services, information services, manufacturing, retail and communications.

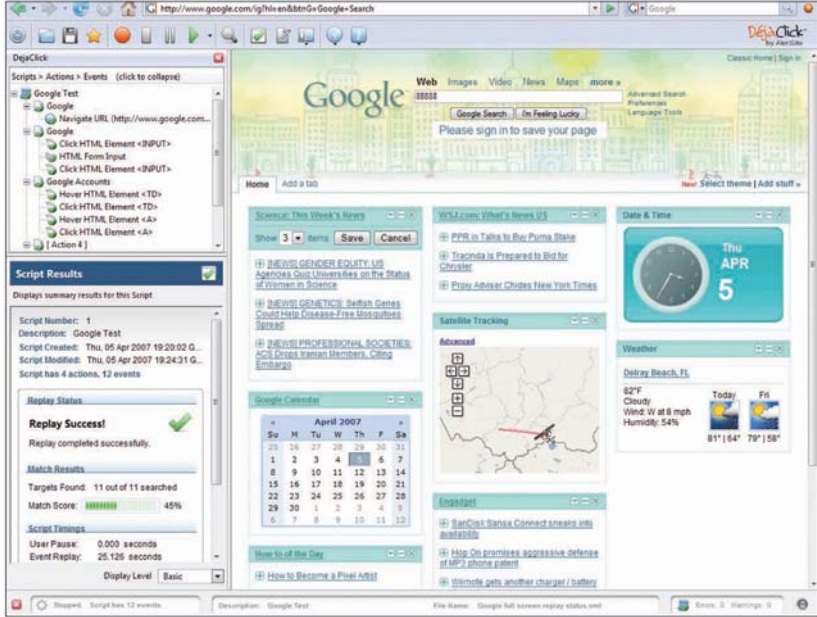

Integrating AlertSite Business Transaction Monitoring

When DéjàClick-generated scripts are deployed to AlertSite® monitoring stations around the world, your Web site is repeatedly tested by “virtual users” all over the globe. You then receive detailed reports on every transaction.

In this way, DéjàClick provides you with a fast, simple and convenient way to make sure your critical business applications are always available and running at peak performance.
