

DATA SHEET

AlertSite Web Load Test

**Simulate peak
real-world load.**

**Verify how well your
site handles heavy
user traffic.**

**Identify application-
tuning options.**

**Pinpoint and
eliminate
bottlenecks.**

**Generate an accurate
representation
of end-to-end
performance.**

The AlertSite® Web Load Test helps predict system performance and shows how well online applications scale under the stress of user demand.

Using your specific performance criteria, it puts your application through an extracting, rigorous test by simulating up to 10,000 simultaneous users.

Our consultants work with you to create testing scripts customized to match your application and typical user workload. Then we run three one-hour load simulations, followed by a final assessment report. This report contains detailing results and recommendations to help take your application to the next level.

Whether you're rolling out new features for existing online applications or launching a marketing campaign to drive Web site traffic, the AlertSite Web load testing service ensures that your applications are ready for production.

We deliver this service over a two-week period and allow for intermediate tuning and adjustments.

DATA SHEET

AlertSite Web Load Test

Collect Comprehensive Performance Information

AlertSite®, in partnership with Mentora Group, delivers a cost-effective, Web load-testing service using AlertSite hardware, software and consultants. This service allows you to verify that your systems can handle maximum user demand.

The AlertSite Web Load Test begins with a planning survey designed to describe the test environment; determine the test objectives and parameters; and identify key transactions. After a site walk through, AlertSite develops test scripts and conducts three test sessions over a two-week period.

Key Features

- Includes infrastructure and software.
- Simulates up to 10,000 users accessing your site simultaneously.
- Quantifies system capacity.
- Provides breakdown by transaction of page presentation times.
- Generates the Performance Profile™ report with detailed results and recommendations.

Customers receive a final summary and Performance Profile Report which includes:

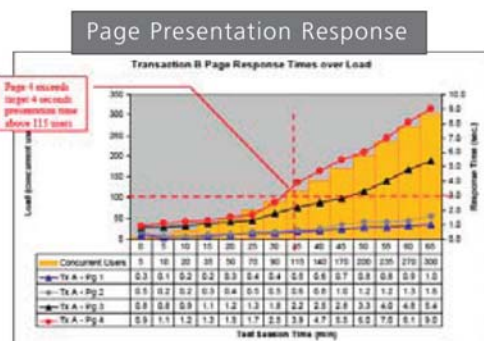

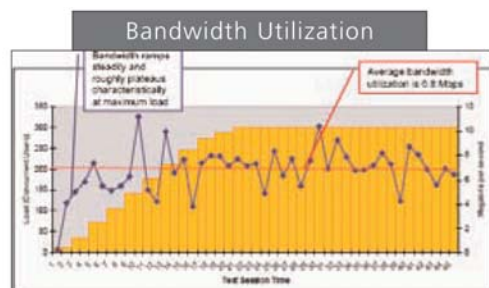

- Transaction scalability.
- Loads achieved.
- Page presentation response breakdown by transaction.
- Bandwidth utilization graph.
- Tuning recommendations.

Unparalleled Service and Support

AlertSite is a leading provider of Web performance measurement, systems monitoring and security vulnerability scanning products that ensure a customer's critical Web-based services are always available and running at peak performance. AlertSite services benefit all types and sizes of businesses and organizations.

Founded in 1998, AlertSite is based in South Florida and maintains over 30 global monitoring stations in highly qualified data centers on every continent but Antarctica. Our global network monitors the availability and performance of your Web site, Web-based applications and transactions wherever they are operating across the globe. When trouble occurs, AlertSite helps you isolate the location of the problem.

AlertSite performance advisors provide the industry's most responsive customer service, making sure that your systems and infrastructure are operating optimally and securely. These highly trained technical experts are always available live from 8:00 a.m. to 6:00 p.m. ET, Monday through Friday. We also offer on-call support through 9:30 p.m. ET during the week.

The Bandwidth Utilization graph quantifies total bytes sent and received. It identifies any bandwidth bottlenecks.

The Page Presentation Response graph quantifies the average page presentation times for all transactions. A complete report shows detail for all relevant transactions.
